At United Washroom we understand that a feminine hygiene sanitary waste service is crucial for the provision of a clean and pleasant washroom environment. Our dedicated team of female representatives provide a discreet, professional service, exchanging your feminine hygiene disposal bin's on a regular basis to ensure you can always be confident you are conforming with government legislation.

- Full compliance to your Duty of Care
- Full waste transfer service
- Fully trained female operatives
- Regular feminine hygiene disposal bag or bin exchange
- Multiple service frequencies
- Natural odour neutralizing granules

Our disposal bins are available in 2 sizes (23 litres and 15 litres) and in a **manual**, **pedal** or **automatic** option to suit your individual washroom requirements.

Natural Odour Protection

We use BIOSOL SANIPRO a natural biocide to control infection and malodour in our Feminine Hygiene Bins. This highly concentrated natural biocide gives best possible protection against bacteria and pathogens, plus a complex, malodour absorbing fragrance that still works even after 6 weeks in a bin!

The multi pocketed sachets give a measured distribution of the granules in the bin. This ensures fast vapour release - the natural biocides used in these products are active in the vapour phase and will keep working as the bin fills.
